

CHEN HUANG

Email: chenhuang.jay@gmail.com | ORCID: 0009-0001-8240-9090 | Dazhou, Sichuan, China

QUALIFICATIONS

Master's degree, Software Engineering

Sep 2022 - Jun 2025

Xihua University, Chengdu, China

- Overall average: **85.9/100**.
- Thesis: Deep Learning for Aspect Sentiment Triplet Extraction and Analysis.
- Selected coursework: Social Networks and Computing (97), Graph Theory and Applications (95), Optimization Theory (94), Natural Language Processing (92), Advanced Algorithm Design and Analysis (89).

Bachelor's degree, Data Science and Big Data Technology

Sep 2018 - Jul 2022

Chengdu College of University of Electronic Science and Technology of China, Chengdu, China

- Overall average: **85.9/100**; GPA: **3.70/4.00**.

ACADEMIC EMPLOYMENT

Faculty Member in Computer Science

Jul 2025 - Present

School of Artificial Intelligence and Big Data, Sichuan University of Arts and Science, Dazhou, China

- Teach undergraduate computer science courses and conduct research in NLP and multimodal sentiment analysis.

RESEARCH PROFILE

- Research areas: multimodal sentiment analysis, fine-grained sentiment analysis, aspect-opinion-sentiment extraction, and knowledge-enhanced modelling.
- First author of four SCIE-indexed journal articles, including three published in JCR Q1 journals and one in a JCR Q3 journal; one additional first-author manuscript under review.
- PhD research interests: fine-grained sentiment analysis, multimodal learning, and knowledge-enhanced NLP.

PUBLICATIONS

(2025). *Bidirectional interaction and inference strategy joint approach for span-level aspect sentiment triplet extraction*. International Journal of Machine Learning and Cybernetics, 16(10), 7621-7636. (**JCR Q3**) DOI: 10.1007/s13042-025-02675-0
5. **Huang, C.**, Li, X., Yang, C., & Hou, X. (2026). *Hierarchical visual evidence modeling and aspect-aware relevance-enhanced fusion network for multimodal aspect-based sentiment analysis*. (Manuscript under review at Expert Systems with Applications)

RESEARCH EXPERIENCE

Ongoing Research | Multimodal Aspect-Based Sentiment Analysis

Jul 2026 - Present

Aspect-Aware Visual Evidence Modelling for Multimodal Sentiment Analysis

- Developed an aspect-aware framework for hierarchical visual evidence selection and noise-suppressed fusion, with a re-annotated MVSA-Single dataset providing aspect-level visual relevance labels; first-author manuscript under review.

Principal Investigator | University Research Start-up Project, Sichuan University of Arts and Science

Nov 2025 - Present

Fine-Grained Multimodal Sentiment Analysis with Syntax Enhancement and Cross-Modal Attention

- Investigating syntax-enhanced representations, hierarchical cross-modal alignment, and dynamic modality weighting for multimodal sentiment analysis.

Principal Investigator | Open Fund Project, Dazhou Key Laboratory of Government Data Security

Jul 2026 - Present

Multimodal Sentiment Analysis for Risk Identification in Government Data Flows

- Investigating multi-source semantic modelling, dynamic fusion, and LLM-assisted risk analysis in government data workflows.

Principal Investigator | Dazhou Social Science Research Planning Project

Mar 2026 - Present

Strategic Pathways for Applying Large Language Models to Smart Cultural Tourism in Dazhou

- Investigating the use of large language models in local cultural-tourism services, data governance, and smart tourism applications.

SELECTED HONOURS & SCHOLARSHIPS

Undergraduate: National Scholarship, Ministry of Education of China (2020–2021); Outstanding Graduate of Sichuan Province (2022).

Postgraduate: Xihua University Master's Academic Scholarship — Second Prize (2023, 2024); Third Prize (2022).
